

Manchester Museum: Main Hall Technical Specification

The Main Hall AV consists of a 4m wide high definition projection screen with stereo audio. The space is designed for wireless connectivity to the stage with a Clickshare, four handheld wireless microphones and one wireless lavalier microphone. Direct video input is via HDMI. Additional audio connectivity is provided via CAT6 stage box to a Behringer X32 digital mixing desk for more complex requirements such as bands or DJs. Audio is provided via a Martin Audio 5000W amp and Martin Audio CDD 12 main pair with SXC118 cardioid subwoofer.
